

PREPARED FOR ABHINAV

Your home’s 20-year energy cost path

Based on your stated monthly bill and typical Arizona utility rate growth.
This is a planning estimate — not a final quote.

ESTIMATED NET SAVINGS

~\$90K – \$100K

Modeled difference between staying on utility power and a fixed solar payment over 20 years.

CUSTOMER

Abhinav

Aashirwaad Bhawan, Mahaveer Colony, Chhatarpur, MP, India

CURRENT MONTHLY BILL

\$400

ASSUMED RATE GROWTH

5% / year

20-YEAR UTILITY COST

\$158,717

If Abhinav stays on the current rate path

ESTIMATED SOLAR PAYMENTS

\$63,360

Fixed-style payment estimate over 20 years

POTENTIAL ADVANTAGE

~\$90K – \$100K

Typical Arizona outcome bracket for this bill size

UTILITY COST IF YOU DO NOTHING

National-average style 5% annual increase applied to your bill

MILESTONE	MONTHLY	ANNUAL	CUMULATIVE

Year 5	\$486	\$5,834	\$26,523
Year 10	\$621	\$7,446	\$60,374
Year 15	\$792	\$9,504	\$103,577
Year 20	\$1,011	\$12,129	\$158,717
20-year total			\$158,717

PRELIMINARY ESTIMATE — AN ON-SITE CONSULTATION FINALIZES YOUR NUMBERS

Figures use your stated monthly bill, public Arizona utility rate context, and regional solar averages. Roof orientation, shading, structure, HOA rules, and your exact rate plan change real savings. Solar payment shown is a planning estimate, not a binding offer. Modeled savings (~\$90K – \$100K) are bracketed around the difference between the utility path and estimated solar payments.
